

# Philips Norelco BeardTrimmer 3100 Handle Replacement

Quick steps to replace the handle.

Written By: filmon gebregergis

## INTRODUCTION

The following steps are a brief guide on how to replace the handle of the Philips Norelco beard trimmer 3100.

---

### TOOLS:

- [Metal Spudger](#) (1)
-

## Step 1 — Front and Back Panels

- Remove the comb from the top of the trimmer.

## Step 2

- Place your thumb underneath the blade and push upward to remove it.

### Step 3

- Hold trimmer towards you as shown in the diagram.
- Insert your prying tool/metal spudger into the marked area.

### Step 4

- Apply gentle pressure and begin prying open the back panel.
- Separate the panel one notch at a time. Listen carefully as you're prying the panel apart and notice each individual notch release.

## Step 5

- Pull the trimmer apart using your hands once the panel is at least halfway apart.
- Pull the wires attached to the battery off of the power connectors before completely removing the back panel.

## Step 6

- Hold the trimmer towards you.
- Place the metal spudger tool in the marked area.

## Step 7

- Apply gentle pressure and begin prying the front panel.
- Separate the front panel one notch at a time.

## Step 8

- Pull the trimmer apart using your hands once the panel is at least halfway apart.

To reassemble your device, follow these instructions in reverse order.
